Farm CSA Member Pledge

“As a member of Kittatinny Mountain Farm’s Traditional CSA, I commit to paying the full price for what I signed up for (Summer Veggie Share, Fall Veggie Share, Pick Your Own Flower Share) I understand that I am joining a CSA in which all produce and flowers are grown on the farm and as such there will be years when due to weather or pests certain crops may do extremely well and others may be almost a complete failure-it will vary from year to year. I understand that the farmers choose crops and varieties to grow based on what they know, from years of experience, will thrive with the specific growing conditions at the farm. I further understand that I am signing up for a CSA share which reflects the seasonality of produce and flowers grown in Northern New Jersey-not all crops will be available all the time, rather they will be available according to seasonal growing limits. I understand that there will be no refunds and that by joining a CSA, I share in the risks and satisfaction of farming, including poor harvests due to weather or pests and bountiful harvests during favorable growing conditions.”

Market CSA Member Pledge

“As a member of Kittatinny Mountain Farm’s Market CSA, I understand that I am paying ahead of time to open a discounted debit account to be used at either the Sparta, NJ or Milford, PA farmers markets or at the farmstand in Wantage, NJ. I understand that there will be no refunds and that I must try to use up my account credit by the end of the growing season. I understand that I can check my account balance at any time. The end of the growing season fluctuates from year to year due to weather. I also understand that seasonal produce availability and variety start to decline as the growing season winds down, therefore I understand that it is best to use up my account credit by mid to late October for optimal choice. I also understand that by joining Kittatinny Mountain Farm’s Market CSA I share in the risks and satisfaction of farming, including poor harvests due to weather or pests and bountiful harvests during favorable growing conditions, which will be reflected in availability of produce at the farmers markets”
